Creates a histogram by a list and plots it like a xyline plot: this allows a very faster exploration of big histograms.

Example:
Create a histogram of this list:
{0,1,0,2,3,1,1,2,3,0,2,4,5,1,7,8,4,5,4,3,3,2,2,2,1,2,0,9,8,3,2,7,7,9,4,8,8,9,2,1,1,1,2,3,8,9,7,3,2,2,1,0,3 2,1,1,2,9,8,7,4,4,5,2,1,0,1,2,3,4,3,2,1,0,1,1,9,2,1,2,1,1,1,2,3,3,3,4,5,4,2,2,11,2,3,13,12,12,12,4,8,7,5, 4,0,12,3,2,11,11,12,13,2,8,8,9,3,3,13,2,4,12,11,13,11,0,0,1,7,2,2,12,0,2,12,13,11,11,0,0,1,2,3,1,1,2, 3,4,5,2,1,2,3,2,0,0}

Enter histog(*list*) and press Enter:

This program has been already used many times without problems. If you find any bug first assure you to have selected the English language in the Mode and not to have translated the code with any program. If the problem persists, please, let me know.
For a better and faster answer, please, enclose some screenshot of the bug: entered inputs, expected outputs, error messages, erroneous code line, Mode setting… it will help me very much!
